DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 44 is rejected under 35 U.S.C. 102(b) as being anticipated by Jensen (3,098,200).

Jensen (Fig. 4) discloses an amplifier circuit comprising: a plurality of push-pull amplifiers (110, 111 and 20, 23) are connected to form a virtual ac ground via inductors (14 and 17), wherein equal and opposite input signals (46) are applied to the respective push-pull amplifier.

Allowable Subject Matter

Claims 1-43 are allowed.

Claim 45 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

Claims 1-43, 45 are allowed over the prior art because none of the prior art disclosed or suggested showing the particular structure and/or operation recited in these claims namely:

Claims 1-43 call for, among others, a plurality of push-pull amplifiers, each amplifier including two gain blocks (two active devices) having the connection thereof.

Claim 45 calls for, among others, combining the output power of the push-pull amplifiers in the first closed loop in a secondary coil that is located in proximity with and magnetically coupled to the first closed loop.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The additional references (Brown (3,157,839); Freitag (5,066,925); Paul et al. (6,448,847)) show further analogous prior art circuitry.

This art is deemed relevant and should be carefully reviews before any amendment is filed.
